

Behram Qureshi

Senior SAP MM / S/4HANA Sourcing & Procurement Consultant

[City, Country] • +1 (555) 019-2834 • bq01-009@example-email.com • linkedin.com/in/behram-qureshi-sap

EXECUTIVE SUMMARY

Highly analytical and results-oriented **SAP Materials Management (MM) and S/4HANA Sourcing & Procurement Functional Consultant** with strong hands-on experience executing **2 full lifecycle implementations** following the **SAP Activate Methodology**. Proven expertise in end-to-end **Procure-to-Pay (P2P)** optimization, enterprise structure mapping, central **Business Partner (BP) / CVI master data architecture**, inventory management, physical inventory, and complex split valuation models.

Demonstrated technical and functional competency in crafting comprehensive **Solution Design Documents (SDD)**, conducting **Fit-to-Standard workshops**, managing **Data Migration via the S/4HANA Fiori Migrate Your Data App**, and executing integration across cross-module touchpoints including **FI/CO (Automatic Account Determination via OBYC)**, **SD (STO & Third-Party)**, **PP (MRP & Backflushing)**, **PM**, and **EWM**. Adept at designing detailed **WRICEF functional specifications**, facilitating UAT, managing complex cutover schedules, and delivering post-go-live hypercare support.

CORE COMPETENCIES & SAP CAPABILITIES

SAP S/4HANA & MM Core Configuration

- **Procure-to-Pay (P2P) Cycle:** Purchase Requisitions (PR), Request for Quotation (RFQ), Quotation Analysis, Purchase Orders (PO), Goods Receipts (GR), Goods Issues (GI), Invoice Verification (LIV), and Dynamic Release Strategies with Classification.
- **Business Partner (BP) & CVI Integration:** Customer-Vendor Integration (CVI) architecture, BP Groupings, Number Ranges, BP Role Assignments, Synchronization Cockpit (MIG_COCKPIT), Data Cleansing, and Consolidation.
- **Inventory & Stock Management:** Custom Movement Types (101, 103, 105, 201, 261, 301, 311, 551, etc.), Stock Transport Orders (STO with/without delivery and billing), Reservations, Physical Inventory, and Cycle Counting.
- **Valuation & Automatic Account Determination:** Valuation Area, Valuation Class, Material Type assignment, Automatic Account Determination (OBYC setup: BSX, WRX, GBB, PRD, KON), Split Valuation (Batch/Origin based), and Price Control (Standard vs. Moving Average).
- **MRP & Demand Planning:** MRP Controller configuration, MRP Live (S/4HANA), Reorder Point Planning, Lot-size calculations, and Consumption-based planning.

Cross-Module Integrations

- **MM-FI/CO:** G/L Account determination via OBYC, Price Variance handling, GR/IR Clearing Account maintenance, Cost Center/Internal Order assignments for direct consumption.
- **MM-SD:** Intercompany and Intracompany Stock Transport Orders (STO), Availability Check (ATP), Delivery & Shipping Point determination, and Third-Party Order processing.
- **MM-PP:** Component Backflushing, Material Staging for Production Orders, Goods Issue against Production, and MRP requirement transfers.
- **MM-EWM:** Storage Location to Warehouse mapping, Interim Storage Area posting, and Transfer Order / Delivery synchronization.

Implementation Methodologies & Delivery Tools

- **Frameworks:** SAP Activate Methodology (Discover, Prepare, Explore, Realize, Deploy, Run), ASAP Methodology.
- **Data Migration:** SAP S/4HANA Fiori App *Migrate Your Data* (Migration Cockpit), Staging Tables via Hana Database, Data Cleansing & Validation.
- **Documentation & Tools:** Solution Design Documentation (SDD), Business Process Master List (BPML), As-Is / To-Be Process Flows, HP ALM / Quality Center, SAP Solution Manager (SolMan), SAP Signavio.
- **WRICEF / Customization:** Functional Specifications for Custom Reports, Interfaces (EDI/IDoc setup for PO output), Conversions, Enhancements (BADI, BAPI, User Exits), and Forms (SmartForms/Adobe Forms).

PROFESSIONAL EXPERIENCE

Senior SAP MM / S/4HANA Functional Consultant

Behram Enterprise Solutions | Islamabad, ISB | Jan 2024 – Present

Client Project 1: Bilal Manufacturing Corp (Greenfield SAP S/4HANA 2022 Implementation)

Industry: Heavy Machinery & Industrial Manufacturing | Scope: Full Lifecycle Implementation using SAP Activate Methodology

1. Discover & Prepare Phases

- Collaborated with project management to define project scope, team charters, governance models, and project charter baselines.
- Participated in initial environment provisioning, system landscape architecture reviews, and baseline configuration setup in SAP Solution Manager.

2. Explore Phase (Requirements & Solution Design)

- Led 20+ **Fit-to-Standard workshops** with key procurement stakeholders to evaluate SAP Best Practices against client operational requirements.
- Developed the end-to-end **Solution Design Document (SDD)** detailing global procurement architecture across 8 international manufacturing facilities.
- Formulated the **Business Process Master List (BPML)** and drafted detailed **As-Is / To-Be process maps** for P2P, Subcontracting, and Consignment processes.

- Identified process gaps and documented **WRICEF Functional Specifications** for localized tax compliance, custom PO workflows, and complex vendor rating scorecards.

3. Realize Phase (Configuration & Integration)

- **Enterprise Structure:** Defined and mapped Purchasing Organizations (Centrally and Plant-specific), Purchasing Groups, Storage Locations, and Valuation Areas.
- **Business Partner / CVI Setup:** Implemented S/4HANA Business Partner concept. Configured CVI synchronization, BP groupings, vendor account groups, field selections, and search helps for 25,000+ global suppliers.
- **Procurement Workflows:** Configured multi-level **Release Strategies** for PRs and POs using classification with dynamic approval thresholds based on Plant, Material Group, and Net Value.
- **Automatic Account Determination (OBYC):** Successfully configured account determination for inventory postings, GR/IR clearing, price differences, and freight accruals across FI/CO chart of accounts.
- **Split Valuation:** Configured Split Valuation for batch-managed raw materials to distinguish internal production batches from externally procured materials.

4. Deploy Phase (Data Migration, Testing & Cutover)

- **Fiori Migration Cockpit Data Migration:** Managed end-to-end master data extraction, transformation, and loading using the **Fiori App "Migrate Your Data" (Migration Cockpit)** using staging tables.
 - Successfully migrated Material Masters, BP Records (Suppliers), Purchasing Info Records (PIR), Source Lists, and Open Purchase Orders.
 - Performed rigorous pre-load validation, error-handling, and reconciliation against legacy legacy databases.
- **Testing Execution:** Created and executed over 150 Unit and System Integration Testing (SIT) scripts using HP ALM. Facilitated 3 weeks of User Acceptance Testing (UAT) with 40+ key business users.
- **Cutover Management:** Managed cutover task execution including initial stock upload (Movement Type 561), open PO migration sequence, and transport execution.

5. Run Phase (Hypercare & Operations)

- Delivered 24/7 hypercare support for 8 weeks post-Go-Live, maintaining a 98% resolution rate for P1/P2 incidents.
- Conducted post-implementation business process optimization, reducing invoice discrepancy volume by 35%.

SAP MM Associated Functional Consultant

Comrades Tech Consulting | Lahore, LHR | Jun 2022 – Dec 2023

Client Project 2: Ehtesham Consumer Goods Ltd (Brownfield S/4HANA Conversion & Optimization)

Industry: Fast-Moving Consumer Goods (FMCG) | Scope: Full Lifecycle Brownfield Conversion & Hypercare

1. Discover & Prepare Phases

- Participated in Pre-Conversion Readiness Checks and Simplification Item List analysis for legacy ECC 6.0 system conversion.
- Assessed existing enterprise structure and legacy data quality to prepare technical conversion timelines.

2. Explore Phase (Fit-to-Standard & Solution Design)

- Assisted in drafting the **Solution Design Document (SDD)** focused on standardizing inventory management processes and S/4HANA delta features.
- Assisted in legacy data profiling and cleansing of 40,000+ vendor records and material master records in ECC prior to conversion.

3. Realize Phase (Configuration & CVI Conversion)

- **Customer-Vendor Integration (CVI):** Executed CVI conversion tasks using Synchronization Cockpit (MIG_COCKPIT), resolving pre-check errors and ensuring seamless transition of vendor master data to S/4HANA Business Partners.
- **Inventory Management & STO:** Configured Intracompany and Intercompany Stock Transport Orders (STO) with delivery via SD and billing functionality for multi-warehouse distribution networks.
- **Movement Types & Account Modifier:** Custom-configured movement types for damaged goods returns, scrapping, and sample issues; assigned specific account modifiers to direct postings to specified Cost Centers.
- **Physical Inventory:** Configured Cycle Counting and annual physical inventory processes, defining tolerance limits for inventory adjustments.

4. Deploy Phase (Testing, Migration Cockpit & Cutover)

- **Data Migration:** Utilized the **Fiori Migration Cockpit** to upload open PRs, historical open items, and physical inventory opening balances.
- **User Acceptance Testing (UAT):** Designed UAT test scenarios for Procure-to-Pay, STO, and Inventory Adjustments. Assisted business leads through test execution phases.
- **User Enablement:** Authored detailed **User Training Manuals** and **Standard Operating Procedures (SOPs)**. Conducted hands-on classroom training for over 60 key and end users using SAP Fiori launchpad applications.

5. Run Phase (Hypercare & Ongoing Support)

- Delivered 6 weeks of dedicated Go-Live Hypercare support. Resolved ticket backlogs covering invoice block releases (MRBR), price difference troubleshooting, and PO release issues.

REPRESENTATIVE SAP PROJECT DELIVERABLES & WRICEF WORK

Category	Deliverable Title	Detailed Functional Description
----------	-------------------	---------------------------------

Interface	Supplier EDI Integration	Designed IDoc ORDERS05 functional specification for automated PO transmission directly to key vendor systems via SAP PO/CPI.
Enhancement	Dynamic PO Price Control	Created functional specifications for BADI_ME_PROCESS_PO_CUST to enforce price tolerance checks against historic PIR trends before line item save.
Report	GR/IR Reconciliation Tool	Developed customized reporting logic to identify open GR/IR items exceeding 60 days to assist accounting teams during month-end closing.
Form	Custom S/4HANA Adobe PO	Redesigned standard PO layout using SAP Interactive Forms by Adobe to include multi-language terms, dynamically rendered line item specs, and QR codes.
Migration	Fiori Migration Cockpit Setup	Configured staging tables and custom migration objects within the Fiori <i>Migrate Your Data</i> app for automated legacy master data loads.

EDUCATION & CERTIFICATIONS

- **SAP Certified Application Associate** – SAP S/4HANA Sourcing and Procurement (C_TS452)
- **Bachelor of Science in Supply Chain Management & Industrial Engineering**
University of Illinois Urbana-Champaign | Graduated: May 20XX
